

EXPERIENȚE ÎMPREUNĂ.

Recommendation

Collaboration with Vegacomp started at the end of 2015, for the first implementation of the Smart City pilot in Telekom, for services related to various electrical works execution, digging, coordination of installation works with various third parties, authorization plan installation of security system and cablings, installation of the APs and IP cameras.

Throughout entire collaboration everything goes very well and we are happy been working with Vegacomp and rely on them for lunching this pilot.

I recommend them for strong commitment and reliability in delivery such services.

Date: May 2016

George Nistor

Project Manager, Telekom Romania
